Use Case Specification: UC-10

- **ID / Code:** UC-10
- **Use Case Name:** Approve Commercial Exception
- **Description:** Allows an Administrator or Super-Administrator (depending on the configured thresholds) to review a pending commercial exception proposal and approve or reject it. If approved, the new conditions are applied to the subscription.
- **Primary Actor:** Administrator (Super-Administrator for amounts above the threshold)
- **Scope:** Subscription Management & Invoicing System
- **Level:** User Goal
- **Stakeholders & Interests:**
  - *Approver:* Wants enough information about the proposed commercial exception to approve or reject it.
  - *Proposer:* Wants to know the decision as soon as possible.
  - *Company (Product Owner):* Wants discounts to be controlled and auditable (FR-2.6.3, FR-2.6.4).
- **Preconditions:** A proposal exists in "Pending Approval" state (UC-09); the actor is the assigned approver or substitute with the required authorization level.
- **Postconditions:** The proposal is "Approved" or "Rejected".
- **Success Guarantee:** If approved, the subscription conditions are updated for the defined validity period, without retroactive changes to already issued invoices; the pricing audit trail records user, timestamp, previous and new price (FR-2.6.4).
- **Minimal Guarantee:** Only an authorized Administrator or Super-Administrator may approve the proposal according to the configured thresholds (FR-2.6.3).
- **Trigger:** The approver opens a pending proposal from a notification or the dashboard (UC-03).
- **Main Success Scenario:**

1. **Approver:** Opens a pending commercial exception.
2. **System:** Displays the proposal and its relevant commercial informatcion.
3. **Approver:** Approves the proposal, optionally adding a comment.
4. **System:** Verifies that the approver's authorization level covers the amount (FR-2.6.3).
5. **System:** Applies the exception to the subscription for the defined period, records the pricing change in the audit trail (FR-2.6.4), and records the rate change in the customer timeline (FR-6.7.2).

- **Extensions:**
  - 3a. Approver rejects the proposal:
    - 3a1. Approver enters the rejection reason.
    - 3a2. System marks the proposal as "Rejected" and keeps the existing standard conditions.
  - 4a. Amount exceeds the Administrator's threshold:
    - 4a1. System prevents the approval and escalates the proposal to a Super-Administrator.
  - 5a. The exception affects a locked financial period (FR-2.7):
    - 5a1. System applies the change only from the next open period, or requires an override (UC-17).
