Use Case Specification: UC-06

- **ID / Code:** UC-06
- **Use Case Name:** Manage Customer Contacts
- **Description:** Allows an Administrator to add, edit and deactivate the contacts associated with a customer account, preserving the audit trail of historical invoices and protecting active billing contacts (FR-1.3, FR-1.6). It contains the extension point **erasure request**, which triggers UC-07.
- **Primary Actor:** Administrator
- **Scope:** Subscription Management & Invoicing System
- **Level:** User Goal
- **Stakeholders & Interests:**
  - *Administrator:* Wants to keep contact information up to date when people join or leave the customer company (UR-2.1, FR-1.3).
  - *Customer company:* Wants invoices and notifications to reach the right person.
  - *Auditor / Tax authority:* Requires that historical invoices remain unaltered (FR-1.3.2, FR-5.4).
- **Preconditions:** The Administrator is authenticated (UC-01) and the customer exists (UC-05).
- **Postconditions:** The customer's contact list reflects the changes; the change is recorded in the customer timeline (FR-6.7.2).
- **Success Guarantee:** Contacts are created, updated or marked as "inactive", and the customer always keeps at least one active billing contact (FR-1.6).
- **Minimal Guarantee:** No contact is physically deleted through this use case, and historical invoices linked to a contact are never altered (FR-1.3.2).
- **Trigger:** The Administrator opens the "Contacts" section of a customer.
- **Main Success Scenario:**

1. **Administrator:** Selects a customer and requests to manage its contacts.
2. **System:** Lists the customer's contacts with their role (billing, operational…), status (active/inactive) and data.
3. **Administrator:** Chooses to add a new contact, edit an existing one or mark one as inactive.
4. **System:** Shows the corresponding form or confirmation.
5. **Administrator:** Enters the data or confirms the action.
6. **System:** Validates the data and the business rules (at least one active billing contact must remain for active customers – FR-1.6).
7. **System:** Saves the changes, records the event in the customer timeline and keeps the link between historical invoices and the original contact (FR-1.3.2).

- **Extensions:**
  - 3a. Erasure request (extension point):
    - 3a1. Administrator indicates that the contact has requested deletion of their personal data.
    - 3a2. UC-07 (Anonymize Contact Data) is executed.
  - 6a. Invalid contact data:
    - 6a1. System indicates the errors and the flow resumes at step 5.
  - 6b. Attempt to deactivate or remove the only billing contact of an active customer:

- 6b1. System blocks the action and explicitly warns that another billing contact must be assigned first (FR-1.6).
- 6b2. The flow resumes at step 3.

▸ 6c. Contact data are used for marketing purposes without consent:

- 6c1. System does not allow marking billing/operational contacts as marketing recipients without an explicit consent record (NFR-5.3).
