Use Case Specification: UC-26

- **ID / Code:** UC-26
- **Use Case Name:** Process Account Cancellation
- **Description:** Allows an Administrator to review and approve or reject a cancellation request, managing outstanding financial obligations (UR-2.6, FR-5.1, FR-5.2, FR-5.3). When approved, recurring billing is frozen while overdue reminders for outstanding invoices persist and historical records are retained.
- **Primary Actor:** Administrator
- **Scope:** Subscription Management & Invoicing System
- **Level:** User Goal
- **Stakeholders & Interests:**
  - *Administrator:* Wants to oversee cancellation management and review outstanding obligations before deciding (UR-2.6, FR-5.3.2).
  - *Company (Product Owner):* Wants to stop billing cancelled customers but keep collecting outstanding debt (FR-5.1, FR-5.2).
  - *Customer company:* Wants no new invoices after cancellation.
  - *Tax authority:* Requires statutory retention of invoices (FR-5.4).
- **Preconditions:** A cancellation request exists in "Pending Review" state (UC-25).
- **Postconditions:** The account is "Cancelled" (approved) or remains active (rejected).
- **Success Guarantee:** On approval, no new recurring invoices are generated from the effective date (FR-5.1); overdue notifications for outstanding invoices continue (FR-5.2); historical data and invoices are retained (FR-5.4); the requester is notified and the event is recorded in the timeline.
- **Minimal Guarantee:** Outstanding invoices and historical records are never deleted; the review screen shows only the minimum authorized account details (FR-5.3.2).
- **Trigger:** The Administrator opens a pending cancellation request (notification from UC-25 or dashboard).
- **Main Success Scenario:**

1. **Administrator:** Opens a pending cancellation request.
2. **System:** Displays the request and the account's outstanding financial obligations (pending/overdue invoices and balance), showing only the minimum authorized account details (FR-5.3.2).
3. **Administrator:** Approves the cancellation and confirms the effective date.
4. **System:** Warns about the consequences and asks for confirmation (NFR-1.5).
5. **Administrator:** Confirms.
6. **System:** Marks the account as "Cancelled" from the effective date and stops recurring invoice generation (FR-5.1).
7. **System:** Keeps active overdue reminders for outstanding invoices (FR-5.2) and retains all historical data (FR-5.4).
8. **System:** Records the event in the customer timeline and notifies the requester.

- **Extensions:**

- 3a. Administrator rejects the request:
  - 3a1. Administrator enters the reason.
  - 3a2. System marks the request as “Rejected”, keeps the account active and notifies the requester.
- 6a. Effective date is in the future:
  - 6a1. System schedules the cancellation; recurring billing continues until that date.
- 7a. No outstanding balance:
  - 7a1. System marks the account standing as “Up-to-Date”; no reminders are kept.
